

## Chemistry 333

### How to Succeed in Chemistry 333

1. Have a positive attitude.
2. Be organized.
3. Develop good study habits
  - a. Devote a regular amount of time to Chemistry 333 each day.
  - b. Find a quiet place to study where you can concentrate.
  - c. Read the chapter assignments in Wade, *Organic Chemistry*, before coming to class.
  - d. Attend all the lectures.
  - e. Take good lecture notes. Review the lecture notes frequently.
  - f. Rewrite lecture notes or make flash cards of topics covered in class.
  - g. Use the lecture notes as a guide for reading Wade, *Organic Chemistry*, a second time.
  - h. Find a study partner or form a study group. Work on problems independently and then together.
  - i. Do all the assigned homework problems. Use the textbook or solutions manual to check your answers after you have worked the problems.
  - j. Do problems from old examinations for additional practice.
  - k. Go to the Learning Resource Center (LRC) on the fourth floor of Bayramian Hall for help. See the Chemistry and Biochemistry Department Office in Eucalyptus 2102 if you want a private tutor.
  - l. Make a list of questions about topics and problems that you don't understand. Ask the instructor, an LRC tutor, or a friend for explanations. Do so promptly.
  - m. Keep up to date!
  - n. Determine how the current topic fits into the overall course.
4. Persevere and be determined to succeed. You will!
