OTHER IMPORTANT PROGRAM INFORMATION:

Typical accepted applicants have a strong DPD GPA, significant work/volunteer experience in dietetics or another area that would provide transferable skills relevant to an internship, and strong interpersonal and communication skills. The program director works with each intern to try to develop the best internship experience possible. Interns that are mature, motivated, flexible, interested in learning, and have strong time management, interpersonal, and organizational skills are more successful. A car is required. Commuting time is to be expected, and a one hour commute each way can be expected as the norm in the Bay Area.

OTHER IMPORTANT PROGRAM INFORMATION:

The USC UCEDD dietetic internship began as a 6 month post graduate experience. Over the years it was converted to an AP 4 program until it gained accreditation as an internship in 1999. We have been training interns to become leaders in the area of pediatric nutrition and developmental disabilities. Interns have an opportunity to actively participate in research and policy.

OTHER IMPORTANT PROGRAM INFORMATION:

Rush University Medical Center, is located just west of downtown Chicago. Rush is a large tertiary medical center and consistently included in published lists of outstanding hospitals. The dietetic internship offers over eighty percent of the supervised practice at Rush. The faculty consists of 22 dietitians (not all full time) who hold MS degrees and 5 PhDs. The faculty to student ratio is over 2:1. Rush uses the teacher-practitioner model which means that the program faculty are also the practitioners in the department. Rush graduates have maintained one of the nation's highest pass rates for first-time takers on the RD exam.

OTHER IMPORTANT PROGRAM INFORMATION:

Although our emphasis is community nutrition, we have a great well-rounded program that you are not limited to community nutrition related careers upon graduation. Our interns have secured positions in clinical dietetics including pediatrics and oncology, teaching at universities, directing school nutrition programs, corporate wellness, and in management. And, you'll graduate with an MS degree, which will be just one more feather in your cap!

OTHER IMPORTANT PROGRAM INFORMATION:

The Boston University MS/DI program combines one year of academic study resulting in a MS in Clinical Nutrition followed by a 29-week DI program. The MS program will prepare you to critically evaluate and implement the results of current research, solve problems, and communicate effectively. You will study with faculty involved in research, education, administration, professional practice, communication, and consulting.

As part of your program, you will develop a research proposal and complete an individually designed practicum. Practicum sites include a variety of specialties such as an eating disorders clinic, a nutrition support team at a large urban hospital, a private practice focused on

OTHER IMPORTANT PROGRAM INFORMATION:

While an interview is not required. A site visit or attendance at our open house in January is strongly encouraged as it helps us to select candidates and helps candidates to determine if Sodexo Southcoast is the right fit for them. There is a \$50 application fee for one concentration, \$75 to apply to both concentrations. Six interns are accepted to our Nutrition Therapy Concentration and six are accepted to our Weight Management Concentration. All interns complete a 37 week core curriculum. Interns in our Nutrition Therapy Concentration will spend an additional 4 weeks in nutrition support and staff relief. Interns in our Weight Management Concentration will spend an additional 4 weeks in weight management programs which include a bariatric surgery program.

OTHER IMPORTANT PROGRAM INFORMATION:

Our program has >2000 hours of training. There are numerous opportunities both within the context of the program as well as outside of the program. Our most successful students are those those have strong time management skills and can prioritize their workload. Hospital experience prior to starting our program is helpful (work or volunteer experience).

OTHER IMPORTANT PROGRAM INFORMATION:

Wellness Workdays offers a unique distance education based program, designed to meet the individual needs and interests of a group of dynamic, inspiring individuals seeking to become Registered Dietitians with a focus on worksite wellness/health promotion. The WW DI allows interns to complete their supervised practice requirements in their local setting using sites and preceptors of their choice. Part-time and full-time options are available. Prospective interns are required to find qualified preceptors in the areas of clinical nutrition (400 hours), long-term care (80 hours), food service management (200 hours), community nutrition (240 hours), elective (40 hours) and worksite wellness (240 hours) to complete their requirements. WW is available to help you locate these individuals. We have an

Wellness Workdays Distance Internship

unparalleled worksite wellness / health promotion concentration that addresses the major health issues currently facing our country.

OTHER IMPORTANT PROGRAM INFORMATION:

The internship preceptors are a strong, committed group of nutrition professionals who provide one-on-one mentoring to the dietetic interns. Students can focus their graduate program on human nutrition, food science or a combination of the disciplines. The internship concentration area is Nutrition Services and Professional Advocacy. The area has been designed to integrate an understanding of the relationship between developing and delivering nutrition services and becoming an advocate for those services, the dietetics profession and oneself as a dietetic professional.

OTHER IMPORTANT PROGRAM INFORMATION:
For application information, please contact the Director for information regarding the ISPP. The internship preceptors are a strong, committed group of nutrition professionals who provide one-on-one mentoring to the dietetic interns. Students can focus their graduate program on human nutrition, food science or a combination of the disciplines. The internship concentration area is Nutrition Services and Professional Advocacy. The area has been designed to integrate an understanding of the relationship between developing and delivering nutrition services and becoming an advocate for those services, the dietetics profession and oneself as a dietetic professional.

OTHER IMPORTANT PROGRAM INFORMATION:

The Beaumont Health System Dietetic Internship Program is committed to serving the nutrition needs of the community, state and nation by providing the highest quality dietetic education. This will be accomplished through preceptor experience, multi-disciplinary education and direct-patient care provided safely, effectively and compassionately.

Program goals include preparing competent dietetic practitioners, providing leadership skills training in the profession of dietetics and contributing to providing the highest quality health care to all patients of Beaumont and its community affiliations.

OTHER IMPORTANT PROGRAM INFORMATION:

Our area of Concentration is working with Rural and Disadvantaged populations. Students get a rich experience in working with underserved groups of people, including minority populations. Courses are taught by outstanding faculty with national and international reputation. We are a strong research institution and students get superb research exposure and experience. Our students become part of our family for 2 years, we have very high standards but also support you and help you succeed. If you have a passion for serving communities and making a difference amongst disadvantaged groups of people, we are the program for you!

OTHER IMPORTANT PROGRAM INFORMATION:

Montana Dietetic Internship (MDI) Non-Degree Graduate Dietetic Internship: The Department of Health and Human Development at Montana State University (MSU) offers a non-degree graduate dietetic internship. Interns typically began the first full week of August and graduate by the first week of June. The MDI program participates in the spring computer matching period for dietetic internship appointments. MDI integrates experiences in clinical and community nutrition, foodservice management, and a concentration in sustainable food systems to provide a unique and progressive supervised dietetic practice experience to future registered dietitians. The MDI Program meets the Accreditation Council for Education in Nutrition and Dietetics Competencies for preparing knowledgeable

Montana Dietetic Internship

professionals in the practice of dietetics. The MDI Program activities include 1,315 hours of supervised practice in various clinical and non-

OTHER IMPORTANT PROGRAM INFORMATION:

The Internship has a recognized emphasis on Health Promotion/Disease Prevention. Throughout the internship, core concepts of Food System Sustainability are integrated with the firm belief that healthy foods are a basis requisit for healthy people. From farm to fork to health and nutrition outcomes, sustainability principles are integrated throughout the internship. The tuition listed is for the 2014-2015 Dietetic Internship program which currently is comprised of the 10.5 month internship combined with enrollment in 3 graduate level courses. We do expect an increase in tuition for the 10.5 month program for 2015-2016 year. There will be 8 students accepted into the 10.5 month internship combined with enrollment in 3 graduate courses for the 2015-2016 class. Additionally, we are anticipating approval

University of New Hampshire Internship

from our University for another track for 8 additional students as part of our new 21 month full-time Masters in Science plus Dietetic

OTHER IMPORTANT PROGRAM INFORMATION:

The program is a combined MS in Nutrition and Dietetic Internship Program. Students complete MS in Nutrition coursework on-line during the first year of the program and the supervised practice component the second year and third fall. Students in the part time option may elect to complete the coursework either full or part time. If choosing to complete the coursework part time, the program will take 3 academic years versus 2 1/2 if choosing to do the coursework full time. While students can live anywhere when completing the on-line coursework, supervised practice is offered as a distance program. Students must live in the designated geographic area (approximately 2 1/2 hours radius of the program).

OTHER IMPORTANT PROGRAM INFORMATION:

IMPORTANT - Deadline for complete DICAS application including references and transcripts is JANUARY 15, 2015. Application fee is in addition to any DICAS fees and should be sent to the Director at 115 Savage Hall, Cornell University, Ithaca, NY 14853 by the application deadline. Visit our website to register for the Open House on December 8, 2014. The Open House begins on the Cornell Campus in Ithaca and includes a visit to site of the clinical and management rotations at the University of Rochester Medical Center (two hours by car north of Ithaca). Transportation to and from Rochester will be provided those who register by November 30, 2014. Participants in the Open House will have an opportunity for an individual meeting with the dietetics internship leadership. Each intern completes an in-depth 14

Program Planning Public Health Pediatrics Eating Disorders Underserved Diabetes Media Retail

Neonatal Leadership Indian Health Military Skills Surgery Private Practice/Entrepreneurship

Other: Research is a minimum of 2 weeks; intermittent work on project takes place throughout the internship program; Master's students

OTHER IMPORTANT PROGRAM INFORMATION:

Although interns accepted to our program are automatically accepted into the graduate programs indicated above, they still need to fill out a separate application for their chosen graduate school. Many of the materials from the DICAS application can be used in this process. Again, graduate programs are optional. For students enrolled in the CWRU program, the two week research experience provided through the internship is substituted for coursework/research experience at CWRU. For both interns and graduate students, however, work on research is a year-long expectation.

OTHER IMPORTANT PROGRAM INFORMATION:

Community Nutrition concentration runs 3-4 weeks at end of program. Graduate-level courses are completed online and run concurrently with associated supervised practice rotations. Admission requirements for the Cedar Crest College Dietetic Internship include the following: Minimum of a Baccalaureat Degree; Verification of Completion of the Didactic Program in Dietetics or the Intent to Complete form from an accredited DPD; Overall GPA and DPD GPA of 3.0 or above; Two semesters (or the equivalent) of a Medical Nutrition Therapy course completed no more than four years prior to application to the Cedar Crest College Dietetic Internship; A biochemistry course completed no more than five years prior to application to the dietetic internship. Interns in the distance track determine their own

Cedar Crest College Distance Internship

supervised practice sites, and there is a great deal of variety in the settings they choose. As long as interns follow the guidelines included

OTHER IMPORTANT PROGRAM INFORMATION:

Admission to the Lipscomb University Dietetic Internship Program is separate from admission to the University. Applying to the graduate school is not necessary as part of the application process for the dietetic internship until after the matching process has selected Lipscomb's 12 interns for the upcoming program year. Applicants must meet the following criteria to be considered for admission to the internship program: Minimum overall GPA of 3.0 on a 4.0 scale, Verification Statement from an approved DPD program in dietetics, Nutrition courses must have been completed within the past 5 years, GRE scores equal to or greater than 800 or 285. A selection committee evaluates internship applications on a competitive basis and determines the individuals to be interviewed. Nutrition related

OTHER IMPORTANT PROGRAM INFORMATION:

The Baylor University Medical Center Dietetic Internship Program's mission is to provide an atmosphere in which the dietetic intern can apply and augment the knowledge base acquired from the academic setting. The program strives to prepare qualified dietetic professionals by imparting to each student the educational standards established by the CADE. The applications of accepted principles of clinical, food service management, and community nutrition are taught on an individualized level. The interns also attend classes taught by physicians, dietitians, department managers, and guest speakers throughout the year to augment the intern's current knowledge and prepare the intern for hands-on experiences. This approach reflects the belief that this will result in graduates who are entry-level

Baylor University Medical Center Internship

professionals who possess an advanced knowledge base, professional skills and an ability to think independently.

OTHER IMPORTANT PROGRAM INFORMATION:

Lamar University (LU) offers an 11-month Dietetic Internship Program (IP) for up to 10 highly qualified college graduates. Applicants who are matched to the program must provide documentation of DPD and/or degree graduation prior to the program start date in July. The key mission of the program is to provide qualified students with learning experiences developed to meet the knowledge, skills, and competencies for entry-level dietitians. The Lamar University Dietetic Internship Program has a Master of Science option available for dietetic interns who are fully accepted into graduate school. The LU IP requires that all interns regardless of degree status (post-bacc, master's, and post-masters) complete 24 hours of graduate credit (IP courses) with 18 of these hours applicable towards a Master of

Lamar University Internship w/Advanced Degree Optional

Science degree from the department. More than 95% of dietetic interns opt to complete the Master of Science degree simultaneously

OTHER IMPORTANT PROGRAM INFORMATION:

Each year, the program obtains feedback from interns and preceptors. We use this information to improve the program. Therefore, it is likely there will be changes from year to year. The number of clock hours in each practice area, locations of rotation sites, and the stipend amount are all examples of things which can change. The number of interns accepted are also subject to change and this is based on available resources and funding. Please, visit our homepage often for the most up to date information. Appointments can also be arranged at other times. We understand the need to conserve resources and visiting the campus for a tour or Open House will not be a factor considering in the selection process.

OTHER IMPORTANT PROGRAM INFORMATION:

The School of Public Health Dietetic Internship Program is poised to lead a preventive health initiative in nutrition by creating a state of the art healthcare and education practice. Students are prepared to educate communities, families, and individuals. With enhanced facilities and collaborative opportunities within the Texas Medical Center and within UT Health, dietetic interns benefit from opportunities that enrich their academic curriculum. The addition of a demonstration teaching kitchen, MNT simulation classroom, and community garden will provide our students with hands-on experience and enable faculty to develop cutting-edge curriculum to augment the existing program.

OTHER IMPORTANT PROGRAM INFORMATION:

This program features a core of 48 RDs at UVA Health System; most serve as preceptors in a variety of specialty area. Our two Nutrition Support Teams, totaling eleven RDs, are highly respected resources and offer training in their speciality areas to professionals from throughout the world. Our Pediatric Team includes seven RDs and functions extensively in the inpatient and outpatient arenas. The full team of preceptors and educators totals close to 75 committed professionals from a variety of backgrounds. Interns are trained at multiple state-of-the-art medical facilities, including the Emily Couric Clinical Cancer Center and the brand new UVA Children's Hospital, known as the Battle Building. The internship is proud of its graduates' first time pass rate of 98% over the past five years. Our DI Program's

University of Virginia Health System Dietetic Internship

focus is adult nutrition support and pediatric nutrition. Interns are required to complete a major capstone project, which may be a

OTHER IMPORTANT PROGRAM INFORMATION:

The program is based in two locations (8 positions in the Northern Virginia/Washington, DC area and 8 positions in the Blacksburg area). These two diverse settings share the resources of a large research based university and the many opportunities available in the urban Washington, DC area. Applicants select their preferred location. Interns are scheduled for experiences based on their interests, past experience and needs. Interns design their own 2 week elective.

OTHER IMPORTANT PROGRAM INFORMATION:

We offer a Masters of Public Health in Nutrition (MPH- Nutrition), a Masters of Science in Nutrition (MS-Nutrition) and a doctoral program in Nutritional Sciences (PhD- Nutrition) along with the Graduate Coordinated Program in Dietetics (GCPD). The GCPD plus the MS/MPH/PhD degree provides interdisciplinary graduate level training in nutritional sciences and the 1200+ hours of supervised practice necessary to sit for the RD exam. Applicants apply to the Nutritional Sciences Program for the degree, and to the dietetics program (GCPD) for the coursework and supervised practice. The UW School of Public Health is a Council on Education for Public Health (CEPH)-accredited program of public health. A research-based master's thesis (MS / MPH) or dissertation (PhD) is required. After completing this program

UW Graduate Coordinated Program in Dietetics

and passing the national exam, students have either the MPH RD, MS RD, or PhD RD credentials, respectively.
