

1. Launch iMovie HD  located on Dock

2. Select  Create a New Project

We suggest you to choose “ **Movies** ” folder for your project location and

*Video Format: DV* for camcorder with tape

Click on “ **Create** ” to create your project

3. Import your video to your project. We suggest you to rewind the tape to the beginning of the selected 10 minutes video. Try NOT to import the whole tape: it will take longer to process.

4. After having 10min of video in the project, Drag this video to ***Timeline*** section

5. Choose *Share* --> *QuickTime* --> Compress movie for: **Web** (as shown in figure Below; VERY IMPORTANT) → click **Share**. You will be asked for location of your final product which is your MOV file; please note it down.
