

**CHEMISTRY 333, SUMMER 2022**  
**ORGANIC CHEMISTRY I**

<b>Instructor</b>	Jeff Charonnat Office: Magnolia 4301 Online Office Hours: MF 1:00 pm – 2:00 pm, T 3:00 pm – 4:00 pm Phone: (818) 677-2109 E-mail: jeff.charonnat@csun.edu
<b>Lecture</b>	MTWThF 11:00 am – 12:15 pm Eucalyptus 2227
<b>Discussion</b>	MF 9:30 am – 10:30 am Eucalyptus 2227
<b>Text &amp; Supplies</b>	Wade, <i>Organic Chemistry</i> , 9th edition Simek and Wade, <i>Solutions Manual for Organic Chemistry</i> , 9th edition A set of molecular models (e.g., <i>Molecular Visions</i> models) A laptop or tablet with a working camera and microphone Internet access capable of streaming video content
<b>Course Web Site</b>	<a href="http://www.csun.edu/~hcchm007/chem333.html">http://www.csun.edu/~hcchm007/chem333.html</a>

**Requisite Courses**

Required prerequisites are Chemistry 102 and Chemistry 102L or their equivalents, with a minimum grade of C- in Chemistry 102.

Current enrollment or a previous passing grade in Chemistry 333L is a required corequisite.

**Course Content and Objectives**

This course examines the structure and properties of organic molecules, with a special emphasis on functional groups and their reactions. Attention is given to the mechanisms of organic reactions and the spectroscopic techniques used to determine the structure of organic molecules.

**Student Learning Outcomes**

Students will demonstrate basic knowledge in the area of organic chemistry.

**Discussion**

The Chemistry 333 discussion utilizes problem sets, structured group work, and quizzes to develop essential analytical and problem-solving skills. Students are expected to download and complete problem sets individually, then meet in their small groups outside of class to discuss and write a composite set to be submitted as a group. All composite problem sets are due by 8:00 am on the day the problem set is covered in class. Each session will be devoted to discussing the solutions to these problem sets in detail. In order to facilitate these discussions, it is expected that students will complete the assigned readings in the textbook according to the attached schedule of readings.

**Quiz and Examination Schedule**

Three quizzes are scheduled for June 10, June 24, and July 8. These quizzes will be held at the beginning of the discussion section. Each quiz is worth 20 points.

Three exams are scheduled for June 14, June 28, and July 12. Each examination is worth 120 points.

## Quiz and Examination Policies

The purpose of examinations is for students to demonstrate individual mastery of the course material. Therefore, examinations will be closed-book, no-collaboration exercises. Molecular models are allowed but calculators and cell phones are both unnecessary and not allowed. Students are required to be logged in to Zoom with the video camera turned on during quizzes and examinations if these exercises are conducted online. Virtual backgrounds in Zoom are allowed.

No make-up quizzes nor exams will be given. Excused absences, substantiated by an appropriate, written confirmation received within two weeks, will result in no penalty. Unexcused absences will result in a zero. A maximum of one examination will be excused in this course.

The final examination must be taken to receive a letter grade for the course.

## Grading

The discussion problem sets are worth a total of 30 points. Attendance and verbally-active participation in the discussion section is worth an additional 30 points. The three quizzes will count for a total of 60 points. (Point total for the discussion component of the course: 120 points.)

The overall letter grade will be based on the three examinations and the 120-point total from the discussion section. (Point total for the course:  $360 + 120 = 480$  points.)

Graded problem sets must be uploaded to Canvas by the stated deadlines. If difficulty is encountered when attempting to upload a graded assignment, the instructor must be contacted within ten minutes of the deadline to avoid a late-submission penalty. There is a 1-point deduction for the unauthorized, late submission of a composite problem set.

The following, approximate percentage values will be used for the assignment of overall course grades: **A** 80% and above; **B** 70–79%; **C** 60–69%; **D** 50–59%; **F** below 50%. The +/- grading system will be used for this assignment.

## Additional Course Policies

No electronic recording (screenshot, audio, photographic, nor video) of the class sessions is allowed. Unless instructed otherwise, all cell phones should be turned off and set aside during class.

All course content (lectures, lecture notes, handouts, problem sets, quizzes, exams, etc.) can be used by you only for your own, personal educational purposes. This course content is protected by copyright law and may not be shared, uploaded, or distributed without authorization. Students who violate copyright law will have their case referred to the Office of the Vice President for Student Affairs for appropriate disciplinary action.

## Academic Honesty

By enrolling in this class, you agree to abide by all California State University, Northridge policies of academic honesty and integrity. Students violating these standards will receive a zero for the work in question and may have their case referred to the Office of the Vice President for Student Affairs for appropriate disciplinary action. For example, students who copy or merely paraphrase another student's work will receive a zero for each instance.

The following pages of the 2021–2022 California State University, Northridge catalog describe details of the University policies:

## **COVID-19 Considerations**

This class will be held in-person and will meet on-campus.

All students coming to campus and who are eligible for a booster shot (six months after the final dose of Pfizer/Moderna or two months after Johnson & Johnson) will be required to provide verification of a booster shot through [self-certification](#).

Students who have not had a booster shot will be required to test weekly while on campus until certification of a booster shot is submitted.

Students qualifying for a religious or medical exemption from vaccination will be required to participate in weekly COVID testing on campus at no cost.

All students must wear masks indoors on campus and must complete the daily health screening survey every time they come to campus.
