

CSU-LSAMP Bridge to the Doctorate

Are you interested in Science, Technology, Engineering or Mathematics (STEM)? You want to pursue a PhD but earning an MS along the way makes sense to better prepare for the doctorate program?

Then, the Louis Stokes Alliance for Minority Participation– Bridge to Doctorate (LSAMP-BD) Program at California State University, Northridge (CSUN) offers you an ideal opportunity.

CSUN is proud of its accomplishments in preparing our student body for careers in the STEM fields, and placement of these students into Ph.D. programs. We have a dedicated faculty that participates in many programs that enhance student research opportunities and promote the success of its diverse student population.

According to the 2006 NSF study of institutions which grant the Master's degree but not the Ph.D., CSUN ranked second in the nation among more than 550 master's-level colleges and universities in graduating students who went on to earn doctoral degrees, and sixth in the nation in graduating baccalaureate students who went on to earn Ph.D.s in science and engineering.

Students Eligible for a BD Fellowship:

- Have earned a BS degree in a STEM discipline
- Participation in an LSAMP program
- U.S. citizenship or permanent residency
- Minimum 3.0 undergraduate GPA
- Acceptance to a CSUN STEM graduate program

Benefits to Fellows:

- **\$30,000** annual student stipend for each of two years
- Tuition and fee supplements
- Participation in research projects with close faculty supervision
- Participation in professional meetings
- Preparation for successful application to PhD Programs
